

New Jet

Standard Portable Fogging Equipment

Description

New Jet is an aerosol ULV (Ultra Low Volume) nebulizer that includes a high powered electric fan which sprays biocide liquids at a distance of 6-7 meters, through special nozzles.

The tank is in corrosion proof polythene and the machine is equipped with double insulation in compliance with international standards. A special metering valve regulates liquid suction, which produces different density mist.

Key benefits

- Compact fogging applicator designed for food and beverage use
- 6-7m aerosol distribution
- Maintenance free design
- Corrosion proof double insulated tank

Technical features

Specifications

Item No.	Description
H89163	New Jet Portable Fogger
Motor	220 VAC, 50 Hz
Power	1 kW
Tank capacity	5 l
Empty weight	3.5 kg
Volume to be treated	5 l to saturate a volume of 4500 m ³
Average droplet diameter	20-60 µm
